Virtual Desktop Service Documentation

Overview

NetApp's Virtual Desktop Service (VDS) solves the complexity of deploying and managing virtual desktops in the public cloud, delivered both as a flexible software service to manage your Virtual Desktop Infrastructure (VDI), or as a fully managed VDI as a Service platform. The Virtual Desktop Service removes the complexity of deploying desktops in the cloud taking the hundreds of tasks that took 2-3 days to deploy into just a few hours.

Virtual Desktop Service Benefits:

- **Reduce Infrastructure Costs**

Our customizable resource scheduling system optimizes infrastructure spending by up to 50%.

- **Reduce Risk**

Deploy desktops into logical workflows per cloud best practices; Such as Microsoft best practice standards for WVD.

- **Custom Automation**

Event driven automation and orchestration engine leveraging your current scripts, making management so easy, general IT administrators can manage your cloud desktops!

- **Multi-Cloud**

Control multiple tenants across AWS, Azure and Google with a single graphical user interface.

- **Flexible Control**

Maximize business flexibility with a single portal to control every layer of your technology stack.
